TILT

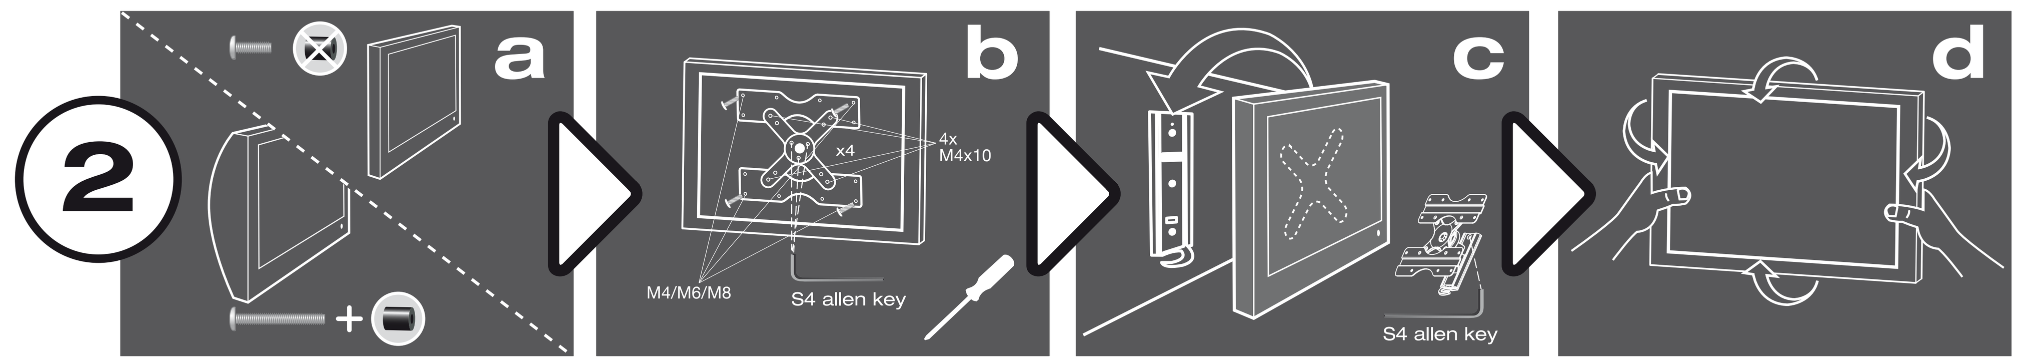

NEIGBAR / INCLINABLE

B

Model: WTS 2 EDP 35551

GB

Before using your device, please read the safety and operating instructions carefully. Only then you will be able to use all the functions safely and reliably. Keep this manual safe and pass it on to any subsequent user.

Proper use

The wall bracket serves for wall suspension of televisions, etc.. This device is exclusively intended for use in private domains in accordance with this manual and may not be used for commercial purposes. Any other form of use constitutes improper use and can result in material damage and even personal injury. The manufacturer does not accept any liability for damage caused due improper use.

Safety instructions

- Please do not use the bracket if it appears to be damaged in any way.
- Do not leave children unattended, while the device is in use. Or locate the device out of the reach of children.
- This device is only intended for indoor use. Please do not use it in humid rooms or near water. Avoid using structures where shocks and vibrations could occur.
- Please have the installation carried out by a professional.
- This wall bracket may only be mounted on vertical, smooth and solid, stable walls/ceilings.
- It may only be burdened up to the specified maximum weight.
- Only original parts may be used. Uncertified parts could result in damages to the television or mounting bracket.
- Make sure that there are no electrical, gas or water lines in the wall/ceiling.
- After installation, please regularly check that all screws are tight every three months. If necessary, loose or damaged screws must be tightened again or replaced.
- Do not dismantle the wall bracket and do not repair it yourself. This would render the guarantee void.

Safety Indication for the attached Wall Fastening Material

Check the characteristics of the wall before you start the assembly. The wall fastening material attached is designed exclusively for the application on walls made of solid bricks, concrete or wooden beams. In case of assembly on walls made of other materials, like hollow bricks, light construction materials or drywalls, please contact your assembler and/or speciality retailer. For a safe assembly of the anchor bolts use the correct drill to make the hole according to the indication (diameter). The drilled hole must be deep enough so that the anchor bolts can enter the wall completely. Any wall covers must not exceed a thickness of 3mm.

Disposal of packing

Packing material shall be recycled. Please do not dispose with household waste and act according to local disposal regulations.
